

**CODECOOL**

**Codecool** is a new approach to teach computer programming. We quest for young talents with the appropriate skill set and motivation to learn coding.

We use innovative training methods and focus on inspiring students to develop programming skills within 18 months.

Throughout their training, students are presented with real life projects and graduate the experience required by the market.

Every student is guaranteed a job upon the completion of the course.

For our new programming school in Kraków, we are seeking

## MENTORS - SOFTWARE DEVELOPERS

Enthusiastic and experienced software developers who have all the skills and motivation needed to train beginners to become junior programmers.

Apply if you:

- \* have a positive attitude, and you can inspire beginners in programming,
- \* are a credible person with a few years of programming experience,
- \* have patience and endurance to help others in learning,
- \* believe in the practice-oriented, project-based learning model and you understand the difference between teaching and mentoring,
- \* are experienced in technology and work with it on a daily basis,
- \* love to learn and educate yourself continuously,
- \* speak Polish and English (you will be mentoring in Polish but the company language is English)

We offer:

- \* innovative work environment
- \* tech-industry salary
- \* full-time employment contract
- \* comfortable office in Kraków
- \* private medical care
- \* MultiSport card

To apply, please send your CV to the following address: [mentor@codecool.com](mailto:mentor@codecool.com)

# Why is it useful?

I

No need for cross platform mobile app

# Why is it useful?

## II

No need for installation/update

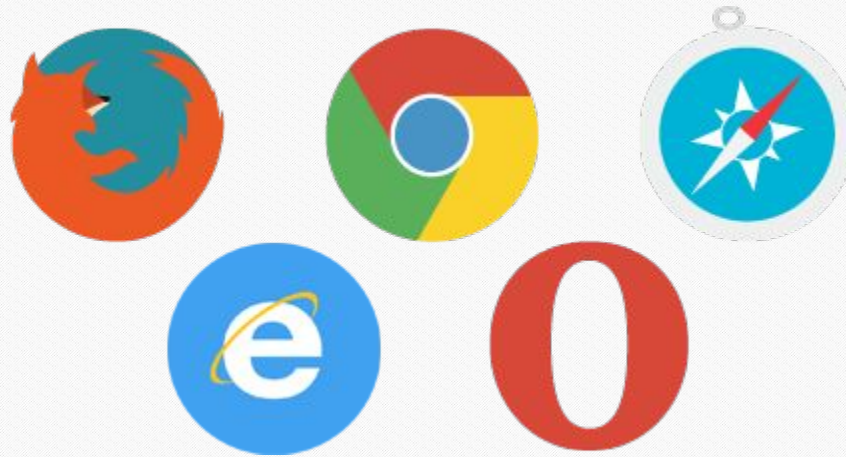

# Why is it useful?

## III

No need for web app

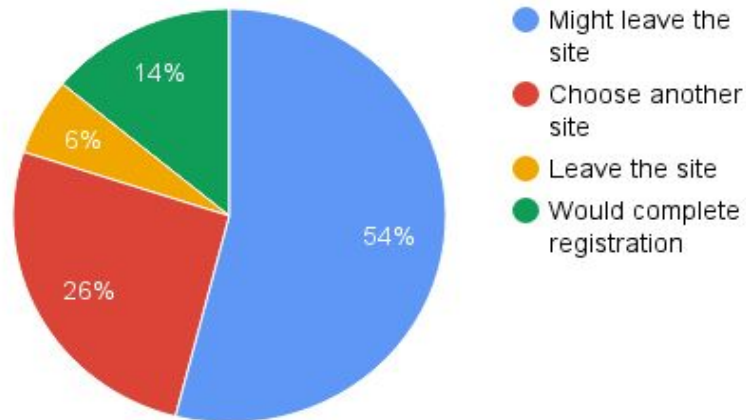

# Why is it useful?

## IV

### No need for registration

Reaction to registration form

# Why is it useful?

V

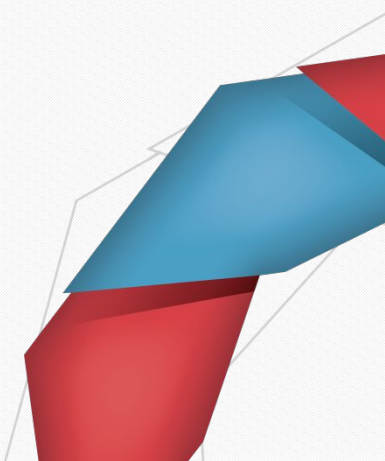

No need for graphic design

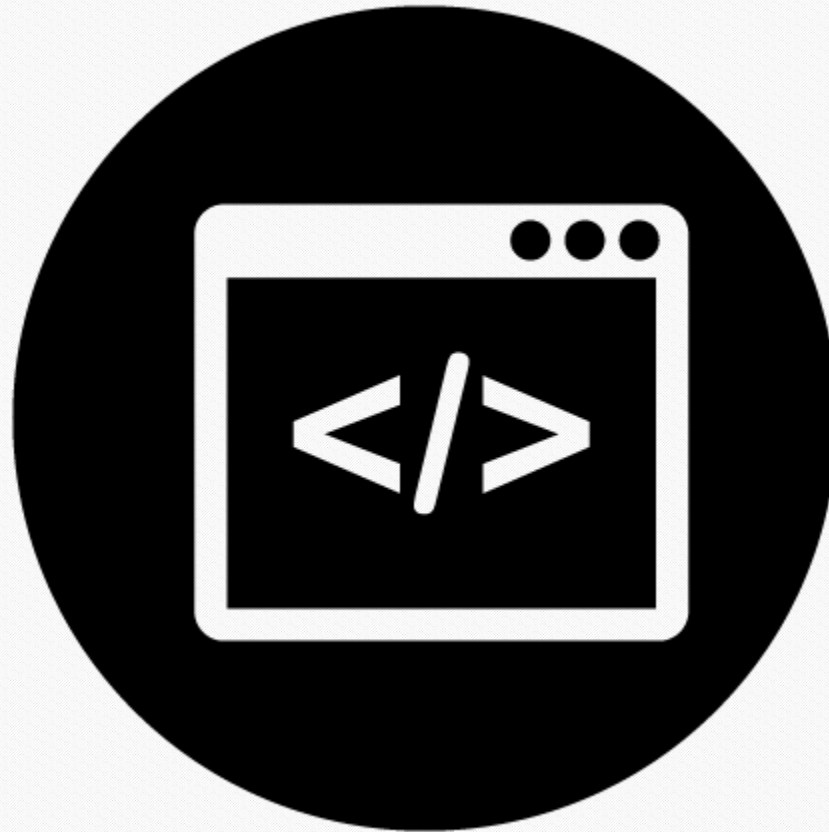

## Why not?

- Dependency on platform provider
- Need new type of UX
- Not applicable for all features

# How to make a bot?

**Thank you**  
for your attention

# Q&A

## Interesting bots
